ARTEMISIA ANNUA: A general response to questions about cancer, AIDS and other diseases

Note: This page is valid only until 31 December 2012. If you access this page from an external link after this date, please go direct to www.anamed.net.

Note for all webmasters: Please do not make any link to this page but only to www.anamed.net.

Dear Friends,

We receive so many questions regarding *Artemisia annua anamed* (A-3), that we have prepared these general remarks:

1. We are astonished how many diseases and health complaints can be treated or helped with tea made from *Artemisia annua*.
2. The pharmaceutical industry has so influenced the law that it is very difficult for small organisations like anamed to offer any remedies legally.
3. Our primary work is to foster self-reliance in the field of health in the tropical world.
4. In Europe, A-3 is not a recognised and registered medicine; for legal reasons, therefore, we cannot accept any responsibility for how A-3 might be used.

Based on the recommendations of the Chinese Pharmacopoeia, on a trial basis anamed co-workers who are suffering either AIDS or cancer take artemisia tea as follows:

- a) In the **acute phase** they drink daily one litre of A-3 tea made with 5 g of dried artemisia leaves (depending on the severity of the disease this may be for a week or even for a period of months).

b) In the **chronic phase**, every day they drink 1.5 g in a mug of boiling water for weeks or even years.

5. We are very actively collecting and compiling the experiences of cancer and HIV/AIDS patients who are drinking artemisia tea. This data will help us to considerably improve our understanding and our recommendations. Therefore we ask you to help us by sharing your experiences with A-3 with us – whether A-3 helped a lot, a little or not at all. If you can give us the results of laboratory tests, even better!

6. Please read our publication about artemisia (Order number 204 in English, 202 in German, 203 in French...). This gives you all the information that you could possibly need about the use of artemisia with malaria, cancer and AIDS. The book "AIDS and Natural Medicine" is available in English or French.

7. So as to avoid any legal problems, we would advise that any sort of prophylaxis or treatment should be conducted under medical supervision. Please therefore order our publications as follows:

“Please send me the Artemisia document in (give the language or order number) together with g of dried leaves of *Artemisia annua anamed* as raw material, not as medicine”. (For example 100 g costs 24 Euro plus p & p)

The reason is that we are not allowed to sell artemisia tea as a medicine. However, with dried artemisia leaves you may produce an ointment. We are allowed, therefore, to sell it as a raw material.

8. In the internet you will find a lot more literature on the theme of cancer and *Artemisia annua*, or AIDS and *Artemisia annua*.

9. You may, at any time, also order an Artemisia Starter-kit from us. Then you can sow your own seeds, grow your own plants and harvest your own leaves. Price 110 Euro plus p&p. Then next autumn you may have enough of your own product.

10. It is up to you as to whether you inform your doctor about this treatment. In the ideal case, your doctor will also be most interested to know the results of this method of treatment. It is also up to you, or to be decided together with your doctor, whether this is the only treatment you use, or whether it should be taken together with another treatment.

11. You will have learnt from our Home Page that our primary concern is not the promotion of Natural Medicine in Europe, but in Africa. If artemisia has indeed helped you, please support our partners in Africa with a donation for: anamed international e.V., account number 7219069, Bank: Kreissparkasse Waiblingen, BLZ (Sort Code) 60250010, In Germany this may be set against tax, and for donations of 50 Euro or more you will receive a receipt. Please therefore give us your full address. Please note that this account is only for donations, not for orders.

With many thanks for your interest,
Hans-Martin Hirt and Keith Lindsey
